DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, 23-41 and 47-53 are drawn to a method for restricting access to data displayed on a display, classified in class 345, subclass 741.
 - II. Claims 18-22 and 42-46, are drawn to a method for controlling the navigation of data on a display, classified in class 345, subclass 817.
2. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility such as a graphical user interface for navigating through a menu. See MPEP § 806.05(d).

Invention II has separate utility such as a parental control option in a graphical user interface. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
